## FROM THE MAYOR

Mayor Patrick Dunlavy

As warmer weather gradually comes, so does construction and development. We as a municipal government are tasked with making sure developments and construction projects are done the right way. It's important we make sure they follow all city ordinances and established building codes.

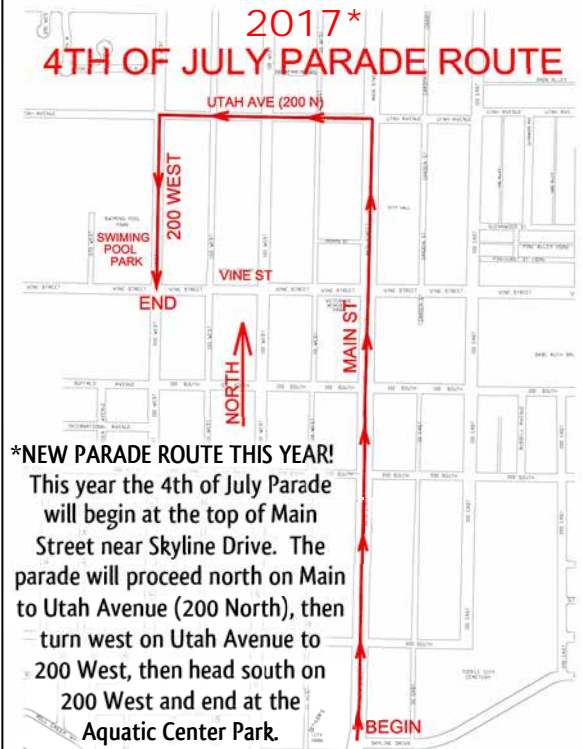

It is also imperative we do our work in making sure we manage when, how, and where growth in our community takes place. We must make

sure to be patient during times of growth, making sure the city has adequate resources such as water and wastewater services; all the while being very sensitive to property rights and the impact certain projects have on not only the community but also individual neighborhoods.

Growth is inevitable. We accept the responsibility to manage it properly. As we do, we are ensuring the wonderful quality of life that we all enjoy is not diminished in anyway.

If you have any comments or concerns, please call me at my office at 435-843-2104 or e-mail me at [patrickd@tooelecitey.org](mailto:patrickd@tooelecitey.org)

Thank you.

## WATER CONSERVATION SCHEDULE

**Area #1** All water users North of Vine and West of Main water Wednesdays and Saturdays.

**Area #2** All water users North of Vine and East of Main water Tuesdays and Fridays.

**Area #3** All water users South of Vine water Mondays and Thursdays.

**Outdoor watering is not permitted on Sundays.**

Visit [www.waterwisepark.org](http://www.waterwisepark.org) for great water wise tips!

The City encourages residents not to water during the hottest hours of the day, typically between 10 am and 6 pm. This conserves water and reduces your water bills.

If there are special circumstances that require a modified schedule for residents or businesses—such as newly planted sod or lawn, contact Tooele City at (435) 843-2150.

City parks and schools have been placed on a modified schedule because of the size of their lawn areas. While some parks and schools may be watering more than two days each week, a specific area of that park is only watered twice during the week.

- Collecting and analyzing water quality data to evaluate watershed protection efforts.

You can help by:
